THM LAB COMPLETION REPORT

Burpsuite Repeater

Name: Muhammad Afnan K O

Focus: WAPT

Platform: TryHackMe.com

1. Objective — What was the task about?

The main objective of this lab was to learn how to use Burp Suite Repeater for testing and analysing web requests. The lab focused on understanding how requests can be captured, modified, and sent again to a web server to observe how the application responds.

2. Concept/Understanding — What did you learn?

I understood that Burpsuite repeater can be used to manually send http requests to a server by modifying the contents or http headers. I also understand the repeater interface of burpsuite and how to use it for request modification

3. Practical Work — What did you perform?

I Completed the lab using Burpsuite repeater operations where I modified a http request by adding a header which game me a flag in response and also did sql injection attack inside the burpsuite repeater, I also made the server error 500 by sending a negative value in a url field which gave me another flag in response.

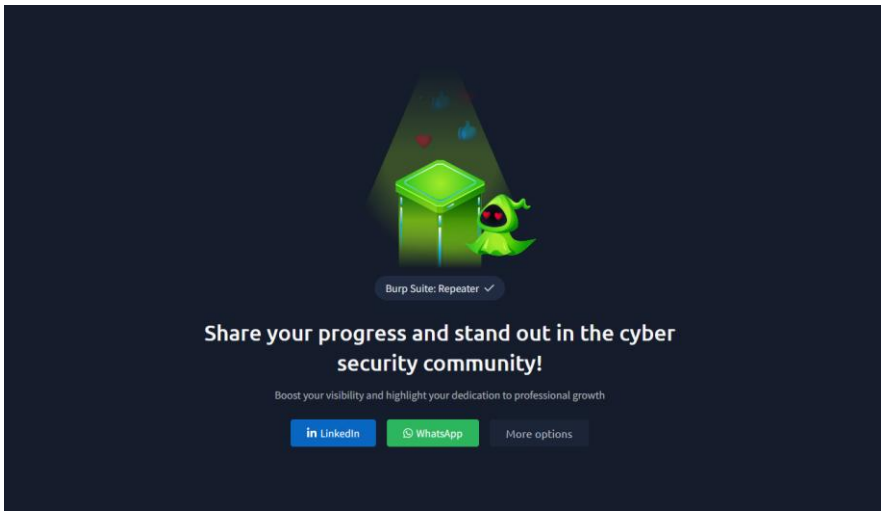

4. Tools Used — Tools used during the task.

- Burpsuite
- Foxyproxy
- Firefox Browser

5. Evidence — Relevant screenshots and results.

Screenshots of the completed TryHackMe rooms, practical exercises, and relevant results can be added below as evidence of the work completed.

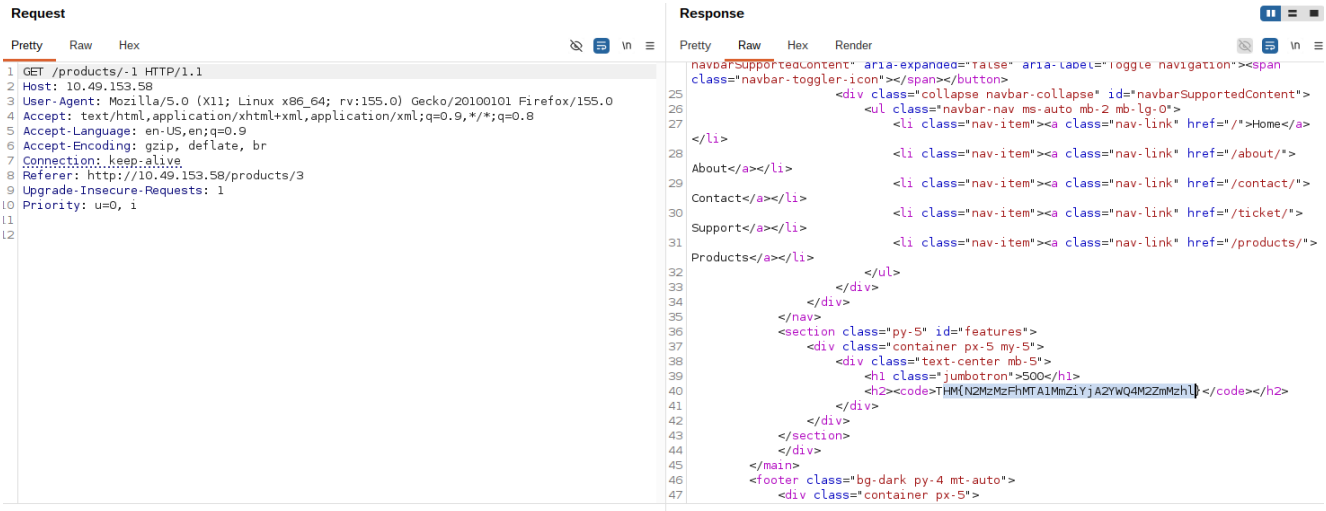

1.Screenshot of room completion:-

2.Screenshot of Repeater tab with crafted header and flag in response:-‘

3.Screenshot of repeater tab with negative parameter and flag in response:-

4.Screenshot of Repeater tab with sql injection attack and flag in response:-

6. Result — What did you achieve or discover?

I successfully completed the Burp Suite: Repeater lab and gained practical experience in sending and modifying HTTP requests. I understood how Repeater can be used to test individual requests and analyse the responses received from a web application. Also familiarized how the repeater functions and how to modify the http requests.

7. Key Learnings — What did you learn from the task?

- Learned the basic purpose and use of Burp Suite Repeater.
- Learned how to modify the http requests and analyse the responses.
- Understand the web requests and responses actually works.
- Improved my understanding of http request manipulation.

Conclusion

This Burpsuite Repeater lab helped me understand how HTTP requests can be manually tested and modified. The practical exercises gave me hands on experience with Burpsuite Repeater and improved my understanding of how web applications respond to different requests. Also I understand how to capture the request using web proxy.
